

Plans for Stellar-

- Student registration
- Alert and Info board (Notifications)
- Set up code that allows students to apply for classes, if a student applies for a class their prerequisites should be checked. If the student meets the requirements for the class, they can apply.
- When a student applies to a certain class, a seat is removed from that class. If they' re 65 seats, there should be 64 remaining seats after the action of applying.
- Add restrictions (Ex. Password format, limit the amount of login tries for each user)
- Add an alert system of some sort. When class only has 5 seats remaining, send an email or notification on the dashboard.
